

State Energy Data System CSV File Documentation

Consumption Estimates

The State Energy Data System (SEDS) comma-separated value (CSV) files contain consumption estimates shown in the tables located on the [SEDS website](#).

There are three files that contain estimates for all states and years in cross-tabulation format. [Consumption in Physical Units](#) contains the consumption estimates in physical units for all states, [Consumption in Btu](#) contains the consumption estimates in billion British thermal units (Btu) for all states, and [Thermal conversion factors](#) contains all of the varying conversion factors used to convert data between physical units and Btu for all states and the United States. Zip files are also available for the large data files. In addition, there is a CSV file for each state, named with the two-letter U.S. Postal Code listed in Appendix A, as well as a file for the United States.

The first record in each file serves as a column heading and contains information about the data in each of the following records. Each data file record that follows begins with the data_status (5 characters, identifying the year of the data cycle plus an “F” that denotes “final”), followed by the state code (2 characters), the data identifier (5-character mnemonic code, or MSN), and the 58 values for the years 1960 through 2017, with all items separated by commas. All items are enclosed in quotes, which means some systems will read numeric values as alphanumeric unless they are converted. Each file contains SEDS consumption in physical units (e.g., thousand short tons, million cubic feet, etc.) and/or in billion Btu.

Consumption estimates contained in these CSV files are rounded to whole numbers. That is, physical unit consumption is rounded to thousand short tons, million cubic feet, etc., and Btu consumption is rounded to billion Btu. Conversion factors and ratios are rounded to three decimal places. The precision does not necessarily reflect the statistical accuracy of the numbers. Users should see the sources cited in the SEDS [Consumption Technical Notes](#) for a discussion of estimation methodologies for specific data series.

The data files contain additional data series not shown in the report tables that have frequently been requested by customers. For example, the additional data include the individual “Other Petroleum Products” used in the industrial sector, as shown in Appendix D of this documentation.

In addition to the cross-tabulation CSV files, there is a consolidated data file containing approximately 1.7 million records of the complete set of SEDS production, consumption, price, and expenditure estimates. Users can download the [zip file](#) or the [CSV file](#) for further processing.

The following appendices explain the data identification codes used in the files. Appendix A lists the state codes. Appendix B gives brief definitions of the components of the variable names. Appendix C lists the specific data series shown in the SEDS tables. Appendix D shows individual petroleum products covered under “Other Petroleum” in the consumption tables.

List of Appendices	
A	State Codes
B	Data Identification Codes (MSN)
C	List of Data Codes shown in Tables
D	Other Petroleum

The consumption estimates contained in SEDS and the methodologies used to derive them are described in the [Consumption Technical Notes](#).

Contacts:

The State Energy Data System tables were prepared by the Integrated Energy Statistics Team of the Office of Survey Development & Statistical Integration, U.S. Energy Information Administration. Questions concerning the contents of the State Energy Data System or these files may be referred to Yvonne Taylor, 202-586-1455, or yvonne.taylor@eia.gov.

Appendix A

U.S. Postal State Codes							
Code	Name	Code	Name	Code	Name	Code	Name
AK	Alaska	ID	Idaho	MT	Montana	RI	Rhode Island
AL	Alabama	IL	Illinois	NC	North Carolina	SC	South Carolina
AR	Arkansas	IN	Indiana	ND	North Dakota	SD	South Dakota
AZ	Arizona	KS	Kansas	NE	Nebraska	TN	Tennessee
CA	California	KY	Kentucky	NH	New Hampshire	TX	Texas
CO	Colorado	LA	Louisiana	NJ	New Jersey	UT	Utah
CT	Connecticut	MA	Massachusetts	NM	New Mexico	VA	Virginia
DC	District of Columbia	MD	Maryland	NV	Nevada	VT	Vermont
DE	Delaware	ME	Maine	NY	New York	WA	Washington
FL	Florida	MI	Michigan	OH	Ohio	WI	Wisconsin
GA	Georgia	MN	Minnesota	OK	Oklahoma	WV	West Virginia
HI	Hawaii	MO	Missouri	OR	Oregon	WY	Wyoming
IA	Iowa	MS	Mississippi	PA	Pennsylvania	US	United States

Appendix B

The 5-letter data identifier (MSN) is a SEDS variable name defined as follows:

Data Identification Codes (MSN)	
Characters	Identity
1 and 2	represent an energy source
3 and 4	represent an energy consumption sector or an energy activity
5	represents a type of data

Energy Source (Characters 1 and 2)	
Code	Name
AB	aviation gasoline blending components
AR	asphalt and road oil
AV	aviation gasoline
BM	biomass
BQ	normal butane
BY	butylene
CC	coal coke
CL	coal
CO	crude oil, including lease condensate
DF	distillate fuel oil
DK	distillate fuel oil, including kerosene-type jet fuel
EL	electricity
EM	fuel ethanol, excluding denaturant
EN	fuel ethanol, including denaturant
EQ	ethane
ES	electricity sales
EY	ethylene
FF	fossil fuels
FN	petrochemical feedstocks, naphtha less than 401 degrees F
FO	petrochemical feedstocks, other oils equal to or greater than 401 degrees F

FS	petrochemical feedstocks, still gas
GE	geothermal energy
HL	hydrocarbon gas liquids
HY	hydroelectric power
IQ	isobutane
IY	isobutylene
JF	jet fuel, total
JK	kerosene-type jet fuel
JN	naphtha-type jet fuel
KS	kerosene
LO	electrical system energy losses
LU	lubricants
MB	motor gasoline blending components
MG	motor gasoline
MM	motor gasoline excluding fuel ethanol
MS	miscellaneous petroleum products
NA	natural gasoline (including isopentane)
NG	natural gas
NN	natural gas excluding supplemental gaseous fuels
NU	nuclear electric power
OH	other hydrocarbon gas liquids (other than propane)
OP	other petroleum products, subtotal
P1	asphalt and road oil, aviation gasoline, kerosene, lubricants, petroleum coke, and “other petroleum products”
PA	all petroleum products
PC	petroleum coke
PL	plant condensate
PM	all petroleum products, excluding fuel ethanol blended into motor gasoline
PP	natural gasoline (pentanes plus)
PQ	propane
PY	propylene
RE	renewable energy

RF	residual fuel oil
SF	supplemental gaseous fuels
SG	still gas
SN	special naphthas
SO	solar thermal and photovoltaic energy
TE	total energy
TN	total net energy
UO	unfinished oils
US	unfractionated streams
WD	wood
WS	biomass waste
WW	wood and biomass waste
WX	waxes
WY	wind

The following codes represent the four end-use consuming sectors, electric power, and total energy consumption:

Energy Consumption Sectors (Characters 3 and 4)	
Code	Name
AC	transportation sector consumption
CC	commercial sector consumption
EI	electric power sector consumption
HC	residential and commercial sectors combined consumption
IC	industrial sector consumption
RC	residential sector consumption
TC	total consumption of all sectors
TX	total consumption of all end-use sectors

The following codes represent energy activities, other energy-consuming sectors, and derived concepts:

Energy Activities (Characters 3 and 4)	
Code	Name
AP	transportation sector consumption per capita
CP	commercial sector consumption per capita

EG	electricity net generation, electric power sector
ET	electricity net generation, total
EX	exports
IM	imports
IP	industrial sector consumption per capita
IS	interstate flow (of electricity)
KC	coke plants consumption
LC	energy losses and co-products (from production of fuel ethanol)
LP	lease and plant fuel
NI	net imports
OC	industrial consumption, excluding coke plants (for coal only)
PZ	pipeline fuel
RP	residential sector consumption per capita
TP	total consumption per capita
VH	vehicle fuel

Types (Character 5)	
Code	Name
B	data in billion British thermal units (Btu)
P	data in physical units: petroleum - thousand barrels natural gas - million cubic feet coal - thousand short tons electricity - million kilowatthours population - thousand people
K	conversion factor: petroleum - million Btu per barrel natural gas - thousand Btu per cubic foot coal - million Btu per short ton electricity (fossil-fueled and nuclear plant heat rates) - thousand Btu per kilowatthours (U.S. only)

Other SEDS variables that do not follow this convention include:

Code	Name
TPOPP	resident population
GDPRX	real gross domestic product
TETGR	total energy consumed per dollar of real gross domestic product

Appendix C

The following section lists the SEDS variables in the order they appear in the SEDS consumption tables. Each table column contains one variable. Variables with only four letters indicate that both physical unit and Btu values appear on the table.

Summary Tables:

Appendix D

In the Total Energy, Total End-use, and Industrial Sector tables, “Other Petroleum” includes asphalt and road oil, aviation gasoline, kerosene, lubricants, petroleum coke, and “other petroleum products” as described in Section 4 of the Consumption Technical Notes. Data for the detailed products are available in the CSV file.

The following lists the components of “Other Petroleum,” the fifth character is either “P” for physical units, or “B” for Btu.

Components of P1TC
ARTC
AVTC
KSTC
LUTC
PCTC
OPTC, which includes:
ABIC
COIC
FNIC
FOIC
FSIC
MBIC
MSIC
SGIC
SNIC
UOIC
WXIC

Components of P1TX
ARTX
AVTX
KSTX
LUTX
PCTX
OPTX, which includes:
ABIC
COIC
FNIC
FOIC
FSIC
MBIC
MSIC
SGIC
SNIC
UOIC
WXIC

Components of P1IC
ARIC
KSIC
LUIC
PCIC
OPIC, which includes:
ABIC
COIC
FNIC
FOIC
FSIC

MBIC
MSIC
SGIC
SNIC
UOIC
WXIC
